

Suite QR Order — In-Room Ordering

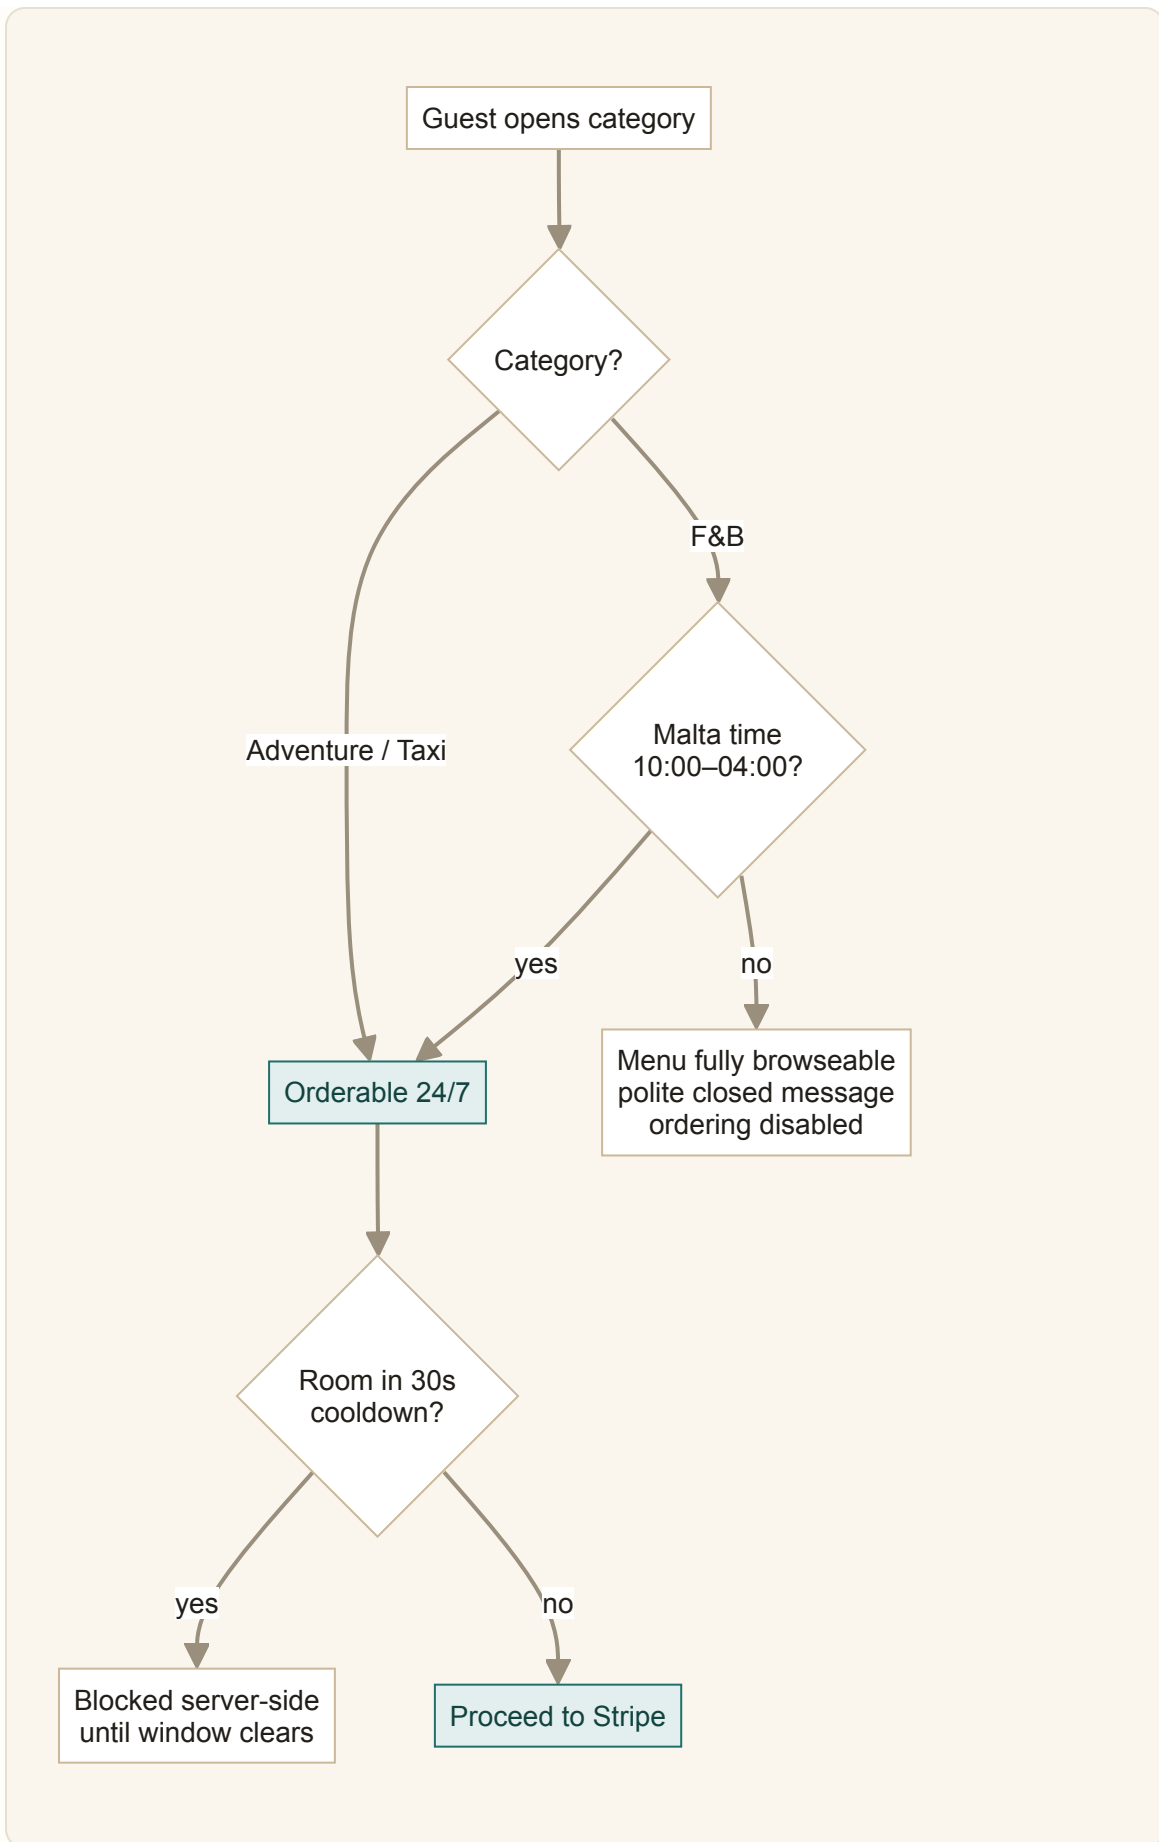

SYSTEM OVERVIEW

86-room Maltese hotel · scan → order → pay → routed to the right team, fully backend

1 — FROM QR SCAN TO THE RIGHT TEAM

2 — SERVICE RULES THE APP ENFORCES

Provider-abstracted — Stripe, WhatsApp (Meta/Twilio) and the order store sit behind interfaces; creds are config

Webhook-authoritative — the owner is notified even if the guest closes the tab before redirect

i18n-ready — English at launch, Italian + French are a content drop, not a refactor

Live demo & code: github.com/waseem253/suite-qr-order
